1951

Norm Cebelak opens Mason Street Garage.

1964

Mason becomes Monarch's exclusive warranty repair facility.

1998

Jeff Cebelak opens Mason Dynamics, moves hydraulic division to new facility.

2007

Bucher Hydraulics acquires Monarch Hydraulics.

Present

Largest stocking Monarch Hydraulics distributor in North America.

## COMPANY HISTORY

Mason Dynamics, Inc. is a family owned and operated company. Frank Cebelak, Norm Cebelak's father, started the three-generation family business as a simple gas station in 1935. Norm began working there at the age of 12, and by 1951 opened his auto repair business, Mason Street Garage.

For a time, Norm also operated a gun shop in the same building, selling and repairing rifles and handguns. He was a member of the board of the Kent Gun League and it was this membership that introduced him to the Jackoboice family, owners of Monarch Hydraulics. At that time, Monarch was looking to outsource their warranty repairs. When Norm was asked if he'd repair hydraulic pumps at the car shop, he jumped at the opportunity. It was around 1964 when Mason Street Garage became the authorized repair facility for all Monarch products.

Forty years to the day after starting Mason Street Garage, Norm sold the company to his son, Jeff Cebelak. Jeff continued to grow the company's reputation in hydraulic repair, sales and distribution. Mason Dynamics, Inc. was formed in 1998 when the hydraulic division grew too large for the garage and moved to its current 22,000 square foot facility.

For nearly 50 years, Mason Dynamics has offered Monarch power unit assembly and service, and today manufactures industrial and gasoline power units as well. Backed by an extensive range of top quality hydraulic products and the largest Monarch inventory in North America, Mason Dynamics is considered to be the experts in the mobile hydraulics industry.

## SERVICE & SUPPORT

### Power Unit Repair

With our expert technicians, advanced repair and testing facility, and massive stock of replacement parts, we're the best source for all Monarch power unit repairs.

### Cylinder Repair

We offer repair on most cylinders up to a 4" bore. For replacing seals, packing sets, and gland nuts, Mason Dynamics has the experienced technicians to get the job done right.

### Warranty

Mason Dynamics, Inc. offers a limited one-year warranty on products purchased directly from Mason. View our full warranty policy online or request a faxed copy.

### Shipping

Whether processing single packages or large freight shipments, our shipping department uses extreme care to ensure each package arrives on time and intact, with most orders shipping within 24 hours.

### Troubleshooting

Having been the exclusive Monarch warranty repair facility for over 40 years, we can often times diagnose system issues by offering troubleshooting advice over the phone.

### Technical Support

Our dedicated team has over 300 years of combined hydraulic experience and will work with your team to help design the best system for your application.

## OEM & DEALER SUPPLIER

Mason Dynamics is a leading supplier of mobile hydraulic systems and components to OEMs and hydraulic dealers throughout the United States and Canada. We maintain a massive inventory of premium products backed by an expert staff with over 300 years of combined hydraulic experience.

Call us today to make the switch to a superior hydraulic supplier.

### Fabrication

Our expert technicians can fabricate reservoirs to mount in any position, change tab locations, add manifold mounts, and install threaded bushings. For larger gasoline and industrial units, we're experienced in building intricate systems and can fabricate frame dimensions, motor mounts, and wheel mounts.

### Custom Power Units

Our massive inventory of Monarch pumps, motors, reservoirs, and manifolds allows us to quickly build and ship a multitude of power unit variations. We also design custom manifolds, build custom control boxes, and will integrate accessories like accumulators, pressure switches, and battery chargers into your system.

## MONARCH AC & DC POWER UNITS

Since 1964, Mason has offered Monarch power unit assembly and service. With our advanced build and test facility, expert technicians, and the largest Monarch parts inventory in North America, we're able to build and ship most power units within a day or two, not weeks or months like other hydraulic dealers and manufacturers.

## GASOLINE POWER UNITS

Mason Dynamics has been manufacturing custom gas power units for over a decade. We have variety of common frame sizes to choose from along with a huge inventory of gear pumps and accessories. Call our sales department to discuss your system requirements.

## INDUSTRIAL POWER UNITS

For over 25 years, we have been supplying and manufacturing industrial power units. We stock quality OEM parts and Baldor motors for our C-Series which allows us to offer fast delivery. Standard options include pumps to 15 gpm, motors to 20 hp, and reservoirs to 50 gal capacities. See our Industrial Power Unit brochure, call, or visit us online for more information and detailed specs.

## SALAMI ALUMINUM GEAR PUMPS

We are a national distributor and leading pump specialist for Salami gear pumps. Our massive inventory of flanges, shafts, and ports for main European, German, and SAE standards allows us to ship most orders within 24 hours. With expert technicians that can build double, triple, and quadruple multi-pumps, change pump rotation, and isolate pump sections for running different fluids, Mason Dynamics is the best source for servicing your aluminum gear pump needs.
